

Product Name :
Ac Motor Position Controller

Product Code :
CSL0016

Description :

Ac Motor Position Controller

Technical Specification :

Ac Motor Position Controller Ac Motor Position Controller Study of AC position servo Two precision servo-potentiometers full 360 degree rotation Calibrated dials for command and output position with 1 degree resolution Motor controller circuit (thyristorized) 110 volt two phase AC servo motor (60 RPM synchronous) Waveform capture/display card 220 Vac mains operation Isolated supplies for motor, control circuit and card Supporting literature with patch cords 220V mains operated
