

Product Name :
Cooling Column Type 5**Product Code :**
ELABBAT006**Description :**

Cooling Column Type 5

Technical Specification :

Cooling Column Type 5 Technical Description The 4 additional cooling columns available as accessories to the Water Cooling Tower differ in the varying magnitude of the packing density and the related varying cooling performance. The Cooling Column, Type 5 has a variable cooling body arrangement. In addition, distributor bases are fitted. A temperature sensors included with the unit enables the water temperature in the distributor bases to be measured. The Cooling Tower, Type 5 is higher than the other cooling towers.
