

Product Name :
Ring And Ball Apparatus

Product Code :
Asphalt Bitumen0001

Description :

Ring And Ball Apparatus

Technical Specification :

This apparatus is used to determine softening point of bitumen. Ring and ball apparatus is used to determine softening point. It is that temperature at which a sample of bituminous material loaded by a 9.5mm dia.-steel ball, drops at a distance of 25mm.

Specifications: The apparatus consists of steel bracket with a sliding plate support. That support has two holes of 10mm dia. on which a Ring and Ball guide can be kept. A central Hole on this plate is for inserting thermometer. Supplied with a glass beaker approximate 8.5cm I.D., 12cm high and a hand stirrer and 2 nos. 9.5mm dia. steel balls.

We are well-known manufacturers, OEM suppliers of Ring And Ball Apparatus for Asphalt/Bitumen Testing Lab Equipments. Contact us for high quality Ring And Ball Apparatus for Asphalt/Bitumen Testing Lab Equipments for schools lab, college lab, universities, research labs, various teaching and workshop training laboratories and industries in India.
