

Product Name :
TORQUE MEASUREMENT MODULE

Product Code :
Measurment0012

Description :

TORQUE MEASUREMENT MODULE

Technical Specification :

Measurement of Torque is a very essential phenomenon, because by nature itself Torque is a very difficult parameter to understand. Also Torque is a very important parameter from Design Engineers point of view. Because it is the key parameter for Hp & other related calculations for Motor or Gear Boxes etc. Here main aim is to demonstrate & explain about what Torque is & then how to measure it.

SPECIFICATIONS

1. Torque Lever
 - Length: - 0.5 Meter
 - Material: - Mild Steel
2. Digital Indicator: -
 - Least Count: - 0.1 Kg-M
 - Digit: - 3 ½
3. Weights: - Max 2 kg in steps of 100 gm
