

Product Name :
Rotary Vacuum Evaporator

Product Code :
SCIENTIFIC0010

Description :

Rotary Vacuum Evaporator

Technical Specification :

Rotary Vacuum 5000 single phase non-sparking geared drive unit 220 volts support stand fitted with heavy duty jack arrangement on stainless steel rod for positioning glass assembly. A variable speed regulator thermodynamic controlled stainless steel water bath, double coiled vertical glass condenser with opening for vacuum & cooling, trap to support & connect condenser with motor unit & receiving flask, round bottom evaporating flask cap. 5000ml provided with flange to connect with motor, unit glass vapour bath tube, round bottom necking pipe extension & special sealing arrangements to maintain a complete unit.
