

Product Name :
UNSTEADY STATE HEAT TRANSFER UNIT

Product Code :
TRANSFORMER0014

Description :

UNSTEADY STATE HEAT TRANSFER UNIT

Technical Specification :

Range Of Experiments To Be Carried Out

- To determine film heat transfer coefficient between the medium in which body is heated.
- To determine film heat transfer coefficient between the medium in which body is cooled.

Experimental Setup :

1. Heater Assembly
2. Aluminum Test Cylinder
3. Fully insulated hot tank assembly
4. Set of thermocouples

Control Panel :

1. 12 Channel Digital

Temperature Indicator

1. Main's On/Off Switch.

2. Voltmeter 0-250 V.

3. Ammeter 0-10 A.

Space Required:

1.5 m² (or 1.5 m²) (side top)

Service Required:

230 V AC Supply 50 Hz
