

Product Name :
Dissection Microscope (Entomological)

Product Code :
MICROSCOPES0003

Description :

Dissection Microscope (Entomological)

Technical Specification :

Heavy round base with a precisely designed body, providing convenience for easy fitting and movement. Sensitive focusing is done by rack & pinion moving on a tapered dovetailed guide way with a stopper to limit the downward movement. A joint mounting arm is provided for moving high eye point lenses over full area of the stage. It is easily replaceable by a special BALL EYE LENS 82 mm diameter, to increase the field of vision. A planoconvex mirror below the stage provides sufficient illumination in daylight or under artificial light. Complete packed in a sturdy wooden carrying cabinet, with provision for placing the hand rest, ball eye lens.

- Optics - Eye piece 10x and 20x & special ball eye lens 82 mm diameter.
- Object Stage Size - 100 mm x 100 mm with glass plate. Packed in wooden box.
