

Product Name :
Core Cutter Apparatus

Product Code :
Soil Testing0011

Description :

Core Cutter Apparatus

Technical Specification :

This Core Cutter Apparatus is used for determination of in situ dry density of natural or compacted fine grained soil, free from aggregates. A cylindrical cutter is used to extract a sample of the soil with the help of a dolly and rammer. From the weight, density and the moisture, and dry density of the soil is easily calculated. It consists one each of: cylindrical core cutter made of steel, 127.2mm. Long and 100mm internal diameter. Steel dolly, 25mm high with a lip to enable it to be located on top of the core cutter, rammer with detachable steel rod.
