

Product Name :
Compression Testing Machine

Product Code :
Soil Testing0044

Description :

Compression Testing Machine

Technical Specification :

- Capacity 200 Tonnes (2000 kN) Electrically Cum Manually Operated.
- Suitable to test concrete cubes of 15 X 15 x 15 cm. And cylinders of 15 X 30 cm, 4 pillar type load frame, S
- specimen duly hardened and surface grinded for excellent smooth finish.
- Suitable to operate on 220/230 V single phase.
- Having adjustable rate of Loading and auto cut off mechanism which will stop the machine a little before reaching to maximum load all the electrical fittings including motor used will be of standard make, fitted with digital load indicator of capacity 2000kN with least count 10N, having peak load hold facility and RS 232port for computer connectivity
