

Product Name :
Triaxial Shear Test Apparatus

Product Code :
Soil Testing0053

Description :

Triaxial Shear Test Apparatus

Technical Specification :

Triaxial Shear Test Apparatus (Motorized) Single Speed With Load Frame

For determining the initial phase strength of soil specimens of 38mm diameter. The length to diameter ratio of sample is 1.2.

Specifications:

One loading unit, for single unit, for single cell mounting, capacity 5 tonnes. The loading unit is supplied with one dial gauge bracket. One Triaxial cell for 38mm dia specimen, stationary loading. Lateral pressure assembly is 10mm x 25mm for strain measurement. One high sensitive proving ring, capacity 20000kg with Calibration Report and carrying case.

Accessories:

High sensitivity proving ring, capacity 1000 kg
