

Product Name :
Los Angles Appratus

Product Code :
HIGHWAY0003

Description :

Los Angles Appratus

Technical Specification :

Los Angeles Abrasion Testing is one of our highly Demanded Products. The main Purpose of Los Angeles Abrasion Testing Machine is for determining the resistance to wear of small size coarse aggregates and crushed rock. Los Angeles Abrasion Testing Machine consists of a hollow cylinder, mounted on a sturdy frame on ball bearings. A detachable shaft which extends throughout the inside length of the drum catches the abrasive charge and does not allow it to fall on the cover. The drum is rotated at a speed of 30-33 rpm by an electric motor through a heavy-duty reduction gear.

Motor is suitable for operation on 415V, 3 phase, 50 HZ, AC Supply.

Supplied complete with a tray for collection of the materials with revolution counter and abrasive charge.
