

**Product Name :**  
Aggregate Impact Test With Counter

**Product Code :**  
HIGHWAY0004

## Description :

Aggregate Impact Test With Counter

## Technical Specification :

Aggregate Impact Value Test Apparatus with Counter is used for determination of resistance to wear for cement concrete flooring slabs. Impact Value Testing Equipment help in determining of the impact value of aggregates and the sturdy construction includes a base, which helps in supporting the columns to form a rigid framework around the quick release trigger mechanism for ensuring the effective free fall of the hammer during test, the hammer is offered with locking arrangement and the free fall can be easily adjusted through the 360° turn. The apparatus is given complete

with cylindrical cup, with the metal measure 75 mm dia x 50 mm high and sampling rod.
