Product Name :
Thermistor Characteristics Apparatus

Product Code :
EEI0015

Description :

Thermistor Characteristics Apparatus

Technical Specification :

To plot negative Resistance co-efficient Characteristics of a Glass Thermistor.

Features:

Instrument comprises of DC Regulated Power Supply (0-15VDC/150mA), two round meters for voltage & current measurement, one Glass Thermistor is kept in Oven, connections of supplies, Meters & Thermistor brought out at 4mm sockets. Also provided with Oven with temperature control knob.
