

Product Name :
Desauty Bridge

Product Code :
EEI0020

Description :

Desauty Bridge

Technical Specification :

It is a simple form of bridge giving maximum accuracy while comparing capacitance in term of resistance. Three decade dial $\times 10$, $\times 100$ and 1000 ohms from one arm. The other arm has also decade dial $\times 10$, $\times 100$ and 1000 ohms. A special mirror key is fitted in the center of the two arms connecting the battery and the galvanometer. The connection is engraved on the panel which is fitted to a black wood polished case. All the coils are calibrated on imported Testing Bridge. Accuracy ± 0.5 to 1% for Desauty Bridge.
