

**Product Name :**  
Vacuum Tissue Processor

**Product Code :**  
MEDICAL0011

## Description :

Vacuum Tissue Processor

## Technical Specification :

Simultaneous processing of upto 200 cassettes.

High quality specimen.

Fully automatic reagent management system.

Comprehensive monitoring and full process control.

Eight programs that consist of upto 8 reagent and 3 parallel run steps.

Large color LCD display.

One touch start of pre saved programs.

Automatic / Manual / running modes.

Auto cleaning cycle.

Low reagent alarm.

Easy, cleaning and maintenance.

Operation	Mixing tissue type	Mixing reagent type
Maximum capacity	50-80 Cassettes	200 Cassettes
Processing volume	1/2 tr (Basket Vol.)	5.3 tr (Basket Vol.)
Temperature (Paraffin)	45-55 deg C	ambient - 99 deg C
Processing time (each step)	99 hrs, 55 mins.	99 hrs, 55 mins.
Number of programs	8	8
Weight	80kg	100kg
Paraffin Baths		
No. of Baths	2 (Optional:3)	3
Volume	1/2 Liter	4 ltr each
Reagent Stations		
Number	10 Bottles	9 Bottles
Volume	1/2 Liter	4 ltr each
