

Product Name :
WATER RO (REVERSE OSMOSIS SYSTEM)

Product Code :
WDU0008

Description :

WATER RO (REVERSE OSMOSIS SYSTEM)

Technical Specification :

It has the latest RO membrane technology in which raw water flows through a 5 micron filter to remove dust, dirt etc, then to carbon cartridge filter which takes out chlorine and organic chemicals and then to activated carbon, it then passes through a semi permeable membrane which rejects bacteria and harmful dissolved impurities.

RO system is suitable for purification of feed water to distillation units & general laboratory use
