

**Product Name :**  
HYBRIDIZATION INCUBATOR

**Product Code :**  
BMHCE0026

**Description :**

HYBRIDIZATION INCUBATOR

**Technical Specification :**

228 hybridization oven is designed to process nucleic acid and protein labeled membranes. The 228 has a single set point temperature controller with precise microprocessor based PID temperature control from 5C above ambient to 95C in 1C increments. Forced air circulation maintains temperature uniformity of  $\pm 0.5C$ . Adjustable solid state solenoid speed control from 0 to 20 rpm. Actual temperature and set points digitally displayed. Through door viewing of hybridization tubes without disturbing chamber atmosphere. Chamber holds ten 28x300mm or twenty 28x150mm hybridization tubes.
