

Product Name :
OVEN UNIVERSAL GMP MODEL

Product Code :
BMHCE0033

Description :

OVEN UNIVERSAL GMP MODEL

Technical Specification :

These Oven Universal (General Type) are general purpose heating equipments, a must for every laboratory. They are sturdy double walled units with outer chamber made of 16 S.S. sheet pre-treated with primers for rust proofing painted with attractive stone enamel or powder coated with inner chamber made up of anodized aluminium or S.S. sheet. The gap between inner and outer chamber is filled with high-grade glass wool to avoid thermal losses. Heated heating elements made of Kanthal A1 wire are placed in this, at bottom and sides. Inner chamber is provided with this for adjusting perforated shelves to convenient height. Temperature is controlled by electronic digital controller/hydraulic thermostat from 0° C above ambient to 250° C + 1° C. Air ventilation are also provided on the sides of the unit.
