

Product Name :
Measuring Tapes

Product Code :
LAE-0002

Description :

Measuring Tapes

Technical Specification :

A tape measure, also called measuring tape, is a type of flexible ruler. Generally speaking, the term “tape measure” refers to a roll-up, self-retracting style tape measure that’s designed for carpentry. The actual tape portion of the measure, called the ‘ribbon,’ is usually constructed from a stiff metallic material that can stiffen when needed but can also roll up for simple use and storage. However, the term covers all types of tape measures – even tailor’s tape. Tape measures are made from a variety of materials, including fiber glass, plastic and cloth. They are among the most common measuring tools used today.

Technical Specifications :

Material: Plastic

Colour: Sky Blue & Black

No. of Pieces: 2

Included Components: 2 Measuring Tapes

Size (L x B x H): Tape: 10 cm x 4 cm x 9 cm; Level: 6 cm x 3 cm x 6 cm
