JAR TEST APPARATUS

Technical Specification :

JAR TEST APPARATUS .

Product Specification / Description

The model with 4 stirring places and with 6 stirring places are fitted with an illuminated back panel for glare-free observation of the samples and are suitable for laboratory use. The jar tester with 4 stirring places is primarily designed for field use. The 4 stirring points are arranged in a circle around a lamp making it easier to observe the flocculation process.

State-of-the-art technology ensures maximum operating convenience and makes the unit maintenance-free. The main features of the laboratory jar testers are the continuously variable stirring speed, the digital display of stirring rpm, the timer function, the illuminated back panel, and the height adjustment option for the stirring blades during operation.

Requires 1000 ml beakers of low form and require 1500 ml beakers of low or high form. The beakers and chemical must be included

We are well-known manufacturers, OEM suppliers of JAR TEST APPARATUS for Switchgear And Protection Lab Equipments. Contact us for high quality JAR TEST APPARATUS for Switchgear And Protection Lab Equipments for schools lab, college lab, universities, research labs, various teaching and workshop training laboratories and industries in India.
