

**Product Name :**  
Angle Dekkor

**Product Code :**  
STR0005

## Description :

Angle Dekkor

## Technical Specification :

- a). Micro optic and manual operated.
- b). Maximum working distance : 12m
- c). Accuracy : 6 sec. of arc
- d). Resolution: 0.5 sec. of arc

## Functions:

- a). Measures surface flatness using collimated light and a moving lens to focus the beam as it travels across the test surface.
- b). Any angle can be measured by comparison with a standard angle or any change of angle can be observed instantly and accurately.
