Product Name: Water Flow Trainer Kit **Product Code:** EELELABT10004

Description:

Water Flow Trainer Kit

Technical Specification:

1~12 L/min Flow rate range measurement Flow control provision

Flow rate display unit

On board BNC socket for CRO connectivity

Provision for measurement of voltage in the

form of voltage using multimeter

Inbuilt power supply

Durable water container

Unbreakable metal enclosure

Capable to operate in commercial temperature

range of 0 to 80 degree C

Can work with Liquid temperature less than

120 degree C

EXPERIMENTS:-

To Measure the flow of water and verify it with CRO output.

To Measure the O/P on LCD.
