

Product Name :
PROXIMITY TRAINER KIT

Product Code :
EELELABT10006

Description :

PROXIMITY TRAINER KIT

Technical Specification :

Platform to learn metal detecting facility using proximity metal detector

Dc motor mechanism to produce rpm

Rpm count display facility to observe count results

Switches control to control direction and motor speed

USB support to program the hardware and for software changes

Voltage control variac to speedup ,speed down the counts ,speed

Test points for conceptual study during different hardware operations

EXPERIMENTS:-

To study and perform the Total no. of count of DC Motor on the LCD

To study and perform speed control of DC motor by varying voltage.

Elab Engineering Equipments Manufacturers
