

Product Name :
Advanced PID Controller Based On Microcontroller

Product Code :
EELELABT10034

Description :

Advanced PID Controller Based On Microcontroller

Technical Specification :

Advanced Pid Controller Based On Microcontroller With Temperature Control 89C51/8031 based PID Demonstrator with sensor & PT-100; Heating source with PWM controlled; Water tank with stirrer; Temperature controller with facility to set Kp, Ki, Kd; 14 bit A/D for monitoring; 12 bit D/A for control; On line acquiring & display of graph; In-built Power Supply; RS-232C interface to be connected to computer; User's Manual.
