

Product Name :
Bio Waste Oil Fired Medical Incinerator

Product Code :
ELB-INCT-0006

Description :

Bio Waste Oil Fired Medical Incinerator

Technical Specification :

Bio Waste Oil Fired Medical Incinerator We are manufacturer, supplier and exporter of a wide range of Bio Waste Oil Fired Medical Incinerator which are built to the need of our customers to improve the environment to control hazardous solid waste. The incinerator reduces most combustible solid wastes to nearly 2-3 percent by weight. We design and build incinerators for specific needs for specific wastes. Our Bio Waste Oil Fired Medical Incinerator also consists of Oil fired burner. Features:- Robust construction Virtually smoke and smell free with secondary burners High temperature refractory lining Quick heat up time and lesser operational time Easy installation Trouble free operation and maintenance Designed to meet standards of central Pollution Control Board (CPCB) Available in oil, gas or electrically fueled Our incinerators have following components: Primary Chamber Secondary Chamber Air Blowers Burners or electric heating elements Feeding Door Ash collection pit with ash tray (optional) Chimney Construction without scrubber: Chamber in incinerators is built as per guidelines of CPCB The body is made of steel and lined with high temperature Refractory that make our Incinerators robust and trouble free for longer life The construction is modular and individual components are easily assembled at site Users:- Hospitals Nursing homes Institutions Industrial wastes Camp wastes Municipal wastes Malls/Shopping centers Animal farms like sheep kennels Specifications:- Capacity Kgs/hr:- 5 to 75 Material:- Stainless steel
