

Product Name :
Half Size Human Skeleton with Muscle

Product Code :
ELAB-HUMC0008

Description :

Half Size Human Skeleton with Muscle

Technical Specification :

Half Size Human Skeleton with Muscle

Description:-

The arms and legs are held on by small screws, making it easy to bend the extremities in all directions.

An exceptional price for this 3-foot skeleton mounted on a heavy metal stand.

This affordable teaching skeleton is wired for natural movement and highlights a removable skull with the calvarium cut.

Mandible hinges with springs allow the examination of TMD problems.

The labeled diagram included.

Skeleton made exclusively from high-quality medical PVC.

All of the bones are cast individually, except for the hands and feet.
