

Product Name :
Human Skeleton 67 Full Size Flexible 170cm

Product Code :
ELAB-HUMC0011

Description :

Human Skeleton 67 Full Size Flexible 170cm

Technical Specification :

Human Skeleton 67 Full Size Flexible 170cm

Description:-

This full-size human skeleton has a flexible spine that can bend to mimic natural human movement.

Both the arms and legs are removable for further study.

The skull features a movable jaw, removable skullcap, suture lines and a full dentition.

Skeleton made exclusively from high-quality medical PVC.

All movable parts are joined by connectors and utilized in such a way to allow movement around the joint.

Hands and feet are wire mounted to demonstrate their natural position.

Bones are cast individually from naturally colored PVC with anatomical detail.

Comes pelvic mounted on a roller base and supplied with a corresponding diagram.
