

Product Name :
Data Acquisition with Switch System

Product Code :
DAT0003

Description :

Data Acquisition with Switch System

Technical Specification :

Data Acquisition / Switch System with a modular structure, which combines precision measurement capability with flexible signal connections, can provide versatile solutions for the applications with multiple points or signals to be tested in product performance test during R&D phase as well as an automatic test during the production process.

Interval scanning with storage of up to 100,000 time-stamped readings

8 kinds of cards supported

Up to 320 switch channels per mainframe, save on cost of ownership

USB logging

JLab300 Series Can be run without PC

61/2 DMM can be enabled/disabled in any of slots

4.3" TFT LCD

Powerful PC software

Standard SCPI commands

Math statistics:AVG, MAX, MIN, SDEV

Elab Engineering Equipments Manufacturers
