

Product Name :
12 Channel ECG Machine

Product Code :
ELAB-ECG0004

Description :

12 Channel ECG Machine

Technical Specification :

12 Channel ECG Machine Simultaneous acquisition of 12-lead ECG data, real-time recording and printing of 12-channel ECG waveform. Graphic display of 12-lead ECG waveform. Built-in analysis software of age which assures accurate analysis result. Auto-measurement, auto-interpretation, waveform playback and storage of ECG data. RS232 and USB interface cope with data-share or remote data management requirement. Option wireless function makes more convenient communication with PC. User friendly operation system contributed by built-in HELP function. Literal and graphic operation interface. Powerful filters to minimize interference. Heart rate measurement and pace-maker protection circuit. Multi-printing formats: manual/automatic, standard 12 channel, 3 channel plus 3 rhythm lead, 6 channel, 6 channel plus rhythm lead, 60s analysis of arrhythmia, R-R histogram, trend graph. AC, DC or built-in lithium battery power supply, alarm of battery weak and lead-off. Comfort and durability contributed by silicon gel keypad. Tremendous ECG data can be saved in built-in SD card ECG 330G.
