

**Product Name :**  
Blood Thaw Machine

**Product Code :**  
ELAB-BOI0004

## Description :

Blood Thaw Machine

## Technical Specification :

Blood thaw machine is used for thawing or warming blood components packed in plastic bags such as frozen plasma, erythrocyte concentrate and whole blood.

Type: Table top Vertical

Blood Bags(100-200ml): 5~10 pcs 10~15 pcs 20~25 pcs

Water Storage: 16kg $\pm$ 5% 35kg $\pm$ 5% 60kg $\pm$ 5%

Thaw Type: Standard Circulating water bath

Optional: Isolated water type Swing type, isolated water plus swing type, isolated water type

Circulating Flow: 30L/min 30L/min 60L/min

Display: Touch screen LCD

Temp. Control Range: RT~60?

Temp. Control Accuracy:  $\pm$ 0.2?

Thawing Time: 10~15min

Consumption: 1.5KW 2.2KW 3KW

Optional: Bar code scanner Automatic descaling device, wireless temperature and humidity monitor, UV disinfection, bar code scanner

Power Supply: AC110/220V $\pm$ 10%, 50/60Hz
