

Product Name :
Lathe Machine

Product Code :
ELAB-MAC0003

Description :

Lathe Machine

Technical Specification :

It is easy to accommodate this equipment in moderate workshops and stays a very good investment for small scale metal industries.
Perfect workshop tool for engineering industry.
Lots of metal cutting works can be tried out using this equipment.
All main components, bed, headstock, saddle, plinth, etc.
Suitable for applying in variety of industrial machining processes.
Precision ball screws and highly rigid precision bearing ensure accurate positioning and heavy cutting capability.
Centralized oil system provides forced automatic lubrication onto ball screws and all mating surface.
It serves the purpose of transforming metal work materials into different shapes over pre-determined dimensions.
It is easy to operate and eradicates many complexities which are present in manual metal shaping.
Maintenance is absolutely hassle free as all the machine components are made of corrosion resistant and higher grade metals.
