

Product Name :
Single Phase Transformer

Product Code :
EEE005

Description :

Single Phase Transformer

Technical Specification :

Single Phase Transformer-
Single phase double wound copper transformer
having primary 230VAC and secondary 115V AC with a rated capacity of
1KVA. The primary and secondary terminals are brought out for conducting
laboratory experiment with legend printed for convenience. This is
assembled in a powder coated MS metal box.

Specifications:

Primary : 230 V AC

Secondary with tappings at 86.6% and at 50% of primary voltage.

Rated capacity: 1KVA

Terminations: Separate 4mm Banana terminals at input and outputs

Enclosure: Powder coated MS metal cabinet, with separate screw terminal for earth connection
