

Product Name :
Steam Generator**Product Code :**
PEM0016 LAB ENGINEERING**Description :**

Steam Generator

Technical Specification :

Steam Generator The electrically heated steam generator is intended to be used to supply and requires only a drain connection. An exhaust flue is not necessary. The steam generator is type approved and does not need any specific permission for operation according to German regulations. Function is fully automatic. The short warm up time until steam is output makes extensive experiments possible in a short time. Comprehensive safety equipment ensures safe operation in all circumstances
