

Product Name :
Exhaust Gas Analyzing Unit

Product Code :
ICE001

Description :

Exhaust Gas Analyzing Unit

Technical Specification :

Exhaust Gas Analyzing Unit The is an accessory for the engine test stands and the associated engines. The unit can be used to measure the exhaust gas composition (CO, CO₂, HC, O₂), the excess air factor ? and the oil temperature in the engine. The menu-based display on the unit is used for calibration, operation and to display the measured data. Interfaces allow it to be connected to a PC or external printer.

We are well-known manufacturers, OEM suppliers of Exhaust Gas Analyzing Unit for Internal Combustion Engines. Contact us for high quality Exhaust Gas Analyzing Unit for Internal Combustion Engines for schools lab, college lab, universities, research labs, various teaching and workshop training laboratories and industries in India.
